DIVERSION OF RED RIVER-IT PROPOSI O FLOW TO THE GULF BY A NEW CHAN Ngi ... It has, for some years, been evident NEL.—It has, for some years, been evident that, by a sure and rapid process, the connection between Red river and the Mississippi is being ent off. The effect of the complete consummation of this process, now going on white extraordinary and alarming rapidity, will be to divert Red river into the Atchafalaya, which affords a channel for its waters and compels it to flow to the Gulf at Berwick's Bay. Thus the whole of the immense and productive flow to the Guilf at Berwick's Bay. Thus the whole of the immense and productive region lying in the valtey of Red river will suffer the embarrassment of being shut off from communication with its natural market, while New Orleans will lose the rich trade which the river country annually pours into her lap. These contingencies are not remote. They will surely happen within a few years if something he not done to obviate them. For some years past the connection between Red river and the Mississipol has been growing more and past the connection between Red river and the Mississippi has been growing more and more precarious, till, in low water, it is almost entirely lost. In the high water season the volume of water which ponsidown the Atchafalaya exceeds the flow of Red river, as the Mississippi actually backs up through Old River, so that the current sets from, instead of into, the main stream.

The Old and the New. To-day at 12 n'elock James Buchanan will cease to be President of the Government at Washington, and his successor, having been duly and formally inaugurated, for of the exalted station to which he will have

Four years ago to-day Mr. BUCHANAN became the President of thirty-three con federated States-the chief executive officer in a Government representing thirty

millions of people. A man of honer and reputation; a politician consistent, conservative, and sincere a statesman of espacity, prudence, and long experience, whatever of opposition there was to the views he held and the princh ples he represented before the people, he entered on his alministration with the confidence and respect of the great mas of the people of both sections, who hoped for and expected a wise and faithful man agement of our affairs.

But clearents of mischlef were at work beneath the surface. There was dange shead, which it required no prophet's ey-

Ou the ruins of former political organ and powerful which presaged the over throw of the Constitution and the oud of the Union in which the hopes and affect tions of so many people were centered. The Whig party had ceased to exist. The American party in the Free States was su perseded already. The Black Republican party, sectional in its ends and aims and organization, limited fulls existence to the non-slaveholding States, declaring in its inception an "irrepressible conflict" against the institutions and properly of lifteen of the States of the Confederacy, and formally affirming in its articles of faith that slavery as it exists in Kentucky and the South is, that it would strengthen the strong and like polygamy, a "relic of barbarism"—this party cast thirteen bundred thousand votes tor its candidate for the Presidency in opposition to Mr. Buchanan, and was then a they claim in others. osition to Mr. prediction of the laud; and its advocates were Memphis Appeal says: iu the Senate and the House of Representa-

us filled the heavets; and we believe no human wisdom and foresight, by any line of patriotic sacrifice or statesmaulike conduct since March 1857, could have averted the present crisis.

Of the outgoing Administration, but little can now be said with profit to the country—but little that would not at once excite comment and contradiction, reopen discussions that are closed, and it should be forever, and reawaken feelings that, however natural and proper once, should be stilled in the presence of the common dangers of the day. The opposition to the acts of that Administration has been determined and violent and bitter heyond example in the previous history of the country; it has done nothing for which it has not been denounced; at has professed nothing for which it is a professed nothing for whose claims and the processes when we know that to revery existence in the future is to be the object of a perpetual assumbt by an aggressive, defiant and attroclous enemy? Is this the sky beneath which we are blandly persuaded to repose, when dangers are gathering thick and fast about us, and every portent cries aloud for action? Is this the feast to which we have been invited? We may well answer, in the language of the great orator, whose claims and the provide was heard three-ounters of a proposition to the acquirer of the country. It has gone to the following for which it has not been denounced; at has professed nothing for denounced; it has professed nothing for which it has not been assailed; it has neglected nothing for which it has neglected nothing for which it has

denounced; it has professed mothing for which it has not been assailed; it has not been assailed; it has not been assailed; it has not been abused; instant in season and out of season, its enemies have been active, industrious, vigitant, and relentless, and no allowance for mavoidable errors of the head of for the difficulties to be met and overcome has modified the animosity or sitigated the hostility of its opponents.

It has closed; and his chief to-day retires to private life, let us hope to enjuy that repose which he must now so much need, and to live long yet surrounded by neighbors and fronds who admire his virtues as a man and appland his conductas a citizen. And if the time has not yet come when we may impartially consider the acts, it is because the prejudices engendered in recent political conflicts still cloud our judgments and shape our conclusions.

And while conscious that we are not exempt from the influences of past political acts to a split devoid of partisanship on the offer side or the other.

With Mr. Breizana's polly must he assembling of the present resistion of congress we, in the undin, as is well known, agreed; and such of his acts 28 we approved, we enstained earnestly and laboricusly, while cirsenting reductantly from, or silently acquiescing in, action which we could not indores, or of the propriety or polley of which we were not clear. The money market was more active today, and at the close it was rather stringent. The demand for loans has greatly
increased, in anticipation of the heavy
payments of the 4th Inst., which many
houses find difficult to meet, owing to the
continued backwardness of country payments, without having recourse to bank
loans. At the banks currency is accumulating, and they are able to afford all reasonable accommodation to customers,

XXXVITH CONGRESS—SECOND SESSION Feiday's Proceedings Concluded. WASHINGTON, Murch 1-SENATE. - Mr. HUNTER opposed the proposition, argu-ing that if it was adopted the Senate would lose the advantages of the Dred Scott de-

cision.

Mr. CHITTENDEN was willing to sacrifice his own views for the good of the country, and would vote against his own and in favor of these in hopes of a pacitic ttlement.
Mr. MASON did not favor amending the 'onstitution or sanction the plan proposed by the Peace Convention, and denounced t as subversive of what rights the South

A long discussion cosned.

Mr. BAKER argued in favor of submitting the question to the people, saying hat events change so much he was willing or events change so much ne was withing to give up a great deal to the Borer States, but nothing to secession.

Mr. GREEN said the propositions of the onterence were the necrest twaddle, but he Crittenden resolutions have some case. The right of property must be seted beyond doubt everywhere. The resolutions from the House were ade the especial order for to-morrow at

In the afternoon session, Mr. PEARCE reported from the Committee on Conference on the Indian Appropriation bill. The report was agreed to Mr. KING presented a large number of Messrs. SUMNER, WILKINSON and

Accommendation from the President was received, transmitting papers in relation to the extradition case of the negro Anderson, which were ordered to be registed. A number of reports from the Committee on Printing were adopted.

House.—The Speaker laid before the
House a letter from Thomas II. Ford, re-The occasional struggle for a recogni-tion by the Speaker occasioned the great-est possible confusion, twenty or more members vigorously springing to their feet holding in their outstretched hands the holding in their outstretched hands lhe propositions they severally strove to offer. The chorns, "Mr. Speaker," "Mr. Speaker," was deafening, but that officer hore this infliction with becoming cesignation. Mr. HASKIN, from the Committee on Printing, reported resolutions, which were passed, to print twenty thousand copies of the abstracted bonds investigation; also the same number of Mordecai and Delafield's report on military operations in the Crimea.

same number of Mordecai and Delafield's report on utilitary operations in the Crimea. Also two thousand copies of the Morrill amended tariff bill.

The President sent a message to the House in compliance with resolutions heretofore adopted, as to the reasons which induced him to assemble so large as unmiber of troops in Washington. He submits that the force is not so large as the resolution presupposes, its total amount being only 653, exclusive of marrines, who are, of course, at the navy yard, as their appropriate station. The troops were ordered here as a posse comitaties, in strict accordance with the civil anthonics, for the purpose of preserving peace and strict accordance with the civil anthorities, for the purpose of preserving peace and order in Washington, should that become necessary before or at the time of the inauguration of the President elect. What was the duty of the President at the time the troops were ordered to the city? Ought he to have walted before this precantionary measure was adopted until he could which woof the country or the country of the country of

ary measure was adopted until he could obtain proof that a conspiracy existed to seize the capitol? In the language of the Select Committee, this was a time of high excitement, consequent upon revolution ary events transpiring all around us; the very air was filled with rumors and most extravagant fears and threats. Under these circumstances, which the President rays he need not detail, as they appear in the report of the Select Committee, he was convinced that he ought to act. The safety of an immense amount of public property in this city, and that of the archives of the Government, in which all the States are Interested, demand it.

At the present moment, when all is quiet

Interested, demand it.

At the present moment, when all is quilet it is difficult to realize the state of plarm which prevailed when the troops were first ordered to this city. This almost instantly subsided after the arrival of the first company, and a feeling of comparative peace and security has since existed both in Washington and throughout the country washington and throughout the country. Washington and throughout the country. Had I refused to adopt these precautionary onessures, and the consequences which many good men at the time apprehended had followed, I should never have forgiven myself. The House then proceeded to the Senate's amendments to the Postoffice Appropriation bill.

The House concurred in the Senate

amendment by a vote of 117 against 4%.

It was presented there by Seinter WIL-SON, and annuls the precent Butterfield mail route to California by El Paso, which now costs \$600,000 for some weekly letter now costs \$600,000 for some weekly letter service, but during the remainder of their contracted time, three and a balf years, gives them the Central Overland route in lieu of the other. They are to carry it daily at \$1,000,000, and deliver the mails at Denver and Salt Lake tri-weekly, and are to run a Pony Express semi-weekly, carrying the pounds each trip, for the Government, free of charge, and reducing the cost of letters by said express one dollar per half ownee. If Butterfield & Co. fall to accept this before the 25th of March, the present contract is to be absolutely annulled, and the central route contract to be let to the lowest bidder, not exceeding \$1,000,000; the entire letter mail to be carried through daily, in twenty days, and the ried through daily, in twenty days, and the residue in thirty-five days, at the contractor's expense, and the latter receive two months' pay for damages for change of service from the Southern to the Central ronte; but the Butterfield Company were required by Mr. Colfax and Mr. Sherman's anneadments to cuter into a written agreerequired by Mr. Colfax and Mr. Sherman's amendments to enter into a written agreement, to be filed in the Postoffleo Department, and to be incorporated into their contract, agreeing to carry 600 pounds of mail matter per trip, which will take all the daily papers, hesides letters; and also relinquishing all claims for damages provided in the Senate amendment.

The bill, after debate, was concurred in exactly as it came from the Senate. So it is now a law. It reduces the cost of mail is now a law. It reduces the cost of mai service to California from \$1,437,000 to one

service to California from \$1,437,000 to one million, increases the service daily, concentrates inail carrying on one line, and abrogates Butterfield's contract without incurring any claim for damages.

Mr. BINGHAM moved to take up the bill reported by him providing for the collection of customs on shipboard in the event of illegal combinations or other obstacles to the execution of the revenue laws, and anthorizing the President, if he deems it necessary, to cimploy the army and naval lorces for that purpose.

Mr. PHELPS objected to its consideration.
